

Please support Picket Number **98P-0151/CP1**. Downed  
animals need to be humanely put to sleep. They have suffered enough.  
Thank You, Lillian K.

We are writing this to say "THANK YOU". Thank you for helping to put an end to ALL animal cruelty, both large and small, endangered and not endangered species. Thank you for preserving ALL our beautiful forests, and trees, and land, all over the world. Thank you for helping to keep ALL the rivers and waterways clean and fresh. Thank you for helping to keep an ecological balance in ALL of nature's wordly system. So that not only as we enjoy all of this, we know that our children, and our children's children, will always enjoy the perfect beauty of animal's in their natural habitat, green forests and tree's filled with nature's awe, river's and stream's and ocean's crystal clear, with the freshest of fresh air to breath.

As each one of these precious blessings are intertwined, we can expect the ultimate blessing to become a reality, "RESPECT FOR EACH OTHER, HUMAN LIFE AND ANIMAL LIFE."

We can only hope and pray that ALL of these "THANK YOU'S" do pretain to you and/or your company, firm, political office, medical laboratory, zoo, or anyone, or anything that might, or will, ruin our world for the next generation's to come.

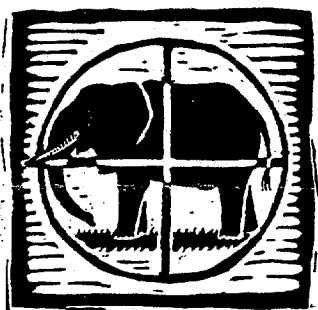

If we ALL don't take this serious NOW, there won't be any reason to later. Please help to leave this world a better place for others to live in, it is YOUR decision to make NOW. Don't pass it on to other's, time is running out!

GOD BLESS YOU and THANK YOU!

"One thing I personally hate about the world is man's cruelty to animals—killing them for ivory or using them to test makeup, etc. That is one thing I would change. I think I would also stop any harm to the environment."

Rachel Blakey, 14,  
Blyth, Northumberland

"I would stop animal slaughter such as fox and stag hunting."

Andrew Joy, 15,  
Stechford, Birmingham

"My personal response would be to change the physical environment of the world—to replenish the world's natural resources and reverse the damage that humanity has exacted on our environment throughout centuries of industrialization.

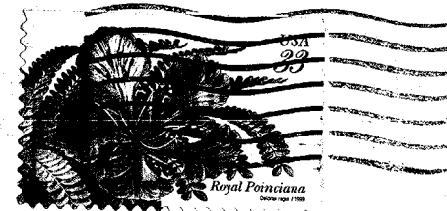

"I would reverse the greenhouse effect, replant forests, clean the air and water supplies. I would choose to do this because I see that such a cleaning-up operation of our world would have several positive effects. For example, famine problems in Africa would be diminished if the land were restored to its natural productive state rather than be exhausted desert land as much of it is at present. There would be fewer cases of illnesses such as asthma, cancer and allergies that are stimulated by pollution in our food chain and air."

Debbie Bunting, 17,
